The Art of entrepreneurship, the Heart of incubation

The Art of entrepreneurship,
the Heart of incubation.

HuygensXC searches, unites, enriches and distributes international knowledge and experience of many experts in the field of enterprise development. HuygensXC makes this knowledge available to you to contribute to the development of enterprising individuals, organisations and economies.

HuygensXC is honouring Christiaan Huygens, the world famous mathematician/inventor, who's ground-breaking work makes him a representative of the experts who's relentless drive has contributed both practically as well as scientifically to the possibilities of individuals to unfold their potential and (re-)create the world around them.

HuygensXC presumes a partnership as basis for the contribution to the goals of its clients, in many cases this translates to a result oriented partnership that is settled on the agreed results. For example HuygensXC maintains lasting partnerships with the BVIT innovation network, XLX, Gate2Growth, DIA and DIMI.

HuygensXC develops and distributes complete training programmes including 'train-the-trainer' and support. The training programmes target starting entrepreneurs, students, incubator managers, incubation & innovation policy makers and enterprise enablers.

EXPERTISE

RESULTANCY

HuygensXC is the natural provider of Experts and Expertise. Our matching service is brought to you in cooperation with ExpertSelect International.

HuygensXC is continuously seeking knowledge, experience and experts. We can frequently inform you, as our partner, of the fruits of these activities. May you yourself possess publications and/or expertise on our area, then you can request to be associated with our organization. Check our expert database and our library to find out if your contribution is complementary. You can always subscribe to our free e-journal or RSS/XML newsfeed.

HuygensXC offers result based consultancy like: Attainability test, financing and fund recruitment systems, organization plan, improvement of durability of organizations that target stimulation and facilitation of knowledge intensive activity.

HuygensXC is also your partner in managing projects and processes in the field of enterprise development and cluster development.
